

Recombinant Mouse SIRPA Protein, Fc-tagged

SIRPA-936M Mouse(SIRPA)

Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview	Recombinant extracellular domain of mouse SIRPA (BAA20376.1) (Met 1-Asn 373) was fused with the Fc region of human IgG1 at the C-terminus.
Source	HEK293
Species	Mouse
Tag	Fc
Predicted N Terminal	Thr 32
Form	Lyophilized from sterile PBS, pH 7.4, 5%~8% trehalose and mannitol.
Bio-activity	Measured by its binding ability in a functional ELISA. Immobilized rat CD47-His at 10 µg/ml (100 µl/well) can bind mouse SIRPA-Fc, The EC50 of mouse SIRPA-Fc is 0.6-1.4 µg/ml.
Molecular Mass	The secreted recombinant mouse SIRPA/Fc is a disulfide-linked homodimer. The reduced monomer comprises 583 amino acids and has a calculated molecular mass of 64.9 kDa. As a result of glycosylation, the apparent molecular mass of rmSIRPA/Fc monomer is approximately 1001-20 kDa in SDS-PAGE under reducing conditions.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method.
Purity	> 90 % as determined by SDS-PAGE.

PACKAGING

Stability	Samples are stable for up to twelve months from date of receipt at -70°C.
Storage	Store it under sterile conditions at -20°C~-70°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of 0.25 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.

GENE INFORMATION

Gene Name	Sirpa signal-regulatory protein alpha [Mus musculus]
Official Symbol	SIRPA
Synonyms	SIRPA; signal-regulatory protein alpha; tyrosine-protein phosphatase non-receptor type substrate 1; mSIRP-alpha1; sirp-alpha-1; myD-1 antigen; SHP substrate 1; inhibitory receptor SHPS-1; signal-regulatory protein alpha-1; CD172 antigen-like family member
GeneID	19261
mRNA Refseq	NM_001177646
Protein Refseq	NP_001171117
Pathway	Cell surface interactions at the vascular wall, organism-specific biosystem; Cell-Cell communication, organism-specific biosystem; Hemostasis, organism-specific biosystem; IL-1 Signaling Pathway, organism-specific biosystem; Osteoclast differentiation, or

Function

SH3 domain binding; protein binding; protein phosphorylated amino acid binding;
