

Aspartate Assay Kit

Product Information

Cat.No.

Kit-0109

Product Overview

Aspartate can be quantified in the range between 0.1-10 nmoles/well (2-200 μ M). (100 assays)
Simple procedure; takes less than ~40 minutes.Fast and convenient

Size

100 assays

Applications

Aspartate can be quantified in the range between 0.110 nmoles/well (2-200 μ M).

Target Species

Mammalian

Usage

This product is furnished for LABORATORY RESEARCH USE ONLY. Not for diagnostic or therapeutic use.

Kit Components

Aspartate Assay BufferProbe (DMSO solution)Serum CleanUp MixAspartate Enzyme MixConversion
MixAspartate Standard (100 mM)

Detection method ColorimetricFluorescence Plate Reader

Compatible Sample Types

Cell Culture SupernatantsPlasmaSerumUrine
