

## Cathepsin K drug discovery Kit

### Product Information

---

**Cat.No.**

Kit-0185

---

**Product Overview**

The Cathepsin K Drug Discovery Kit is a complete assay system designed to screen inhibitors of cathepsin K. Using a convenient microplate format, cathepsin K activity is monitored fluorimetrically using the substrate provided in the kit.

---

**Size**

96 wells

---

**Applications**

Fluorescence microscopy, HTS. Screening potential activators or inhibitors of cathepsin K using the recombinant enzyme supplied in the kit. This kit is NOT suitable for measuring cathepsin K activity in biological samples.

---

**Storage**

-80°C

---

**Kit Components**

Cathepsin K (human) (recombinant), AMC substrate, AMC calibration standard, inhibitor, assay buffer, 1/2-volume white microplate.
