

DNA-Protein Binding Colorimetric Assay Kit

Product Information

Cat.No.

Kit-0304

Product Overview

Protein-DNA interactions play a critical role for cellular functions such as signal transduction, gene transcription and epigenetic silencing. Identifying the genetic targets of DNA binding proteins and knowing the mechanism of protein-DNA interaction is important for understanding cellular processes. DNA-Protein Binding Assay Kit (Colorimetric) allows the user to investigate direct in vitro protein-DNA interaction, using dsDNA of choice, within 3 hours. The kit is specifically suitable for detection of transcription factor activation in mammalian tissue and cell extracts.

Size

96 tests

Applications

Functional Studies more details

Target Species

Reacts with: Mouse, Human; Predicted to work with: all Mammals

Storage

Store at +4°C.

Kit Components

Components: 96 tests; 10X Wash Buffer: 1 x 20ml; 8 Well Assay Strips (with Frame): 12 units; Antibody Dilution Buffer: 1 x 20ml; Assay Binding Buffer: 1 x 4ml; Developing Solution: 1 x 10ml; Stop Solution: 1 x 6ml

Assay time

3h 00m
