

## Glycerol-3-Phosphate Colorimetric Assay Kit

### Product Information

---

#### Cat.No.

Kit-0348

---

#### Product Overview

---

G3P Assay Kit (Colorimetric) is used for measuring glycerol-3-phosphate using colorimetric methods.

---

#### Description

---

Glycerol-3-phosphate (G3P) is an important intermediate for all living organisms. Glycerol-3-Phosphate is produced either by glycerol via glycerol kinase or by dihydroxyacetone phosphate through glycerol-3-phosphate dehydrogenase. In response to cellular signals, glycerol-3-phosphate can be utilized in multiple pathways: it can be further converted into glyceraldehyde-3-phosphate and enter glycolysis or rapidly generate NAD<sup>+</sup> in brain or muscle tissues through the G3P shuttle or enter the lipid biosynthetic pathway. Recent studies have found that glycerol-3-phosphate is a novel regulator and plays a fundamental defense role in plant pathogenesis. G3P Assay Kit (Colorimetric) is a sensitive, fast and easy-to-use kit. In this assay, G3P is oxidized by G3P Enzyme Mix to form an intermediate, which reduces a nearly colorless probe to a colored product with strong absorbance at 450 nm. This assay kit can detect G3P less than 2 nmol/well and can be used for a variety of sample types.

---

#### Applications

---

Measurement of Glycerol-3-Phosphate in various tissues/cells  
Analysis of carbohydrate and lipid metabolism and cell signaling  
Drug screening

---

#### Usage

---

For research use only (RUO)

---

#### Storage

---

Store kit at -20°C, protected from light. Warm Assay Buffer to room temperature before use. Briefly centrifuge small vials prior to opening.

---

#### Kit Components

---

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## Glycerol-3-Phosphate Colorimetric Assay Kit

G3P Assay Buffer 25 ml G3P Enzyme Mix (Lyophilized) 1 vial G3P Probe (Lyophilized) 1 vial G3P Standard (Lyophilized) 1 vial

---

**Detection method** Colorimetric

---

**Compatible Sample Types**

Cell culture, Tissue samples
