

## Cathepsin E Activity Assay Kit (Fluorometric)

### Product Information

#### Cat

Kit-1055

#### Common Name

Cathepsin E

#### Cat.No.

Kit-1055

#### Description

Cathepsin E (CTSE, EC: 3.4.23.34) is a gastric aspartyl protease that functions as a disulfide-linked homodimer. This protease has a specificity similar to that of pepsin A and cathepsin D. It is an intracellular proteinase that is found in highest concentration on the surface of epithelial mucus-producing cells of the stomach. It is the first aspartic proteinase expressed in the fetal stomach and is found in more than half of gastric cancers. Cathepsin E Activity Assay Kit utilizes the ability of an active Cathepsin E to cleave a synthetic MCA-based peptide substrate to release free MCA, which can be easily quantified using a fluorometer or fluorescence microplate reader. This assay kit is simple, rapid and can detect Cathepsin E activity as low as 1 mU in biological samples.

#### Applications

Detection of Cathepsin E activity in tissue and cell lysates  
Determine activity of purified Cathepsin E

#### Storage

-20°C

#### Shipping

Gel Pack

#### Size

100 assays

#### Kit Components

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## Cathepsin E Activity Assay Kit (Fluorometric)

CTSE Assay Buffer; CTSE Lysis Buffer; CTSE Substrate; Human Cathepsin E (Positive Control); MCA Standard (1 mM)

---

**Detection method** Fluorescence (Ex/Em = 320/420 nm)

---

### Features & Benefits

Rapid & convenient;

Detects Cathepsin E activity as low as 1 mU in biological samples
