

## Glycogen Assay Kit

### Product Information

#### Cat.No.

Kit-0379

#### Product Overview

Glycogen Assay Kit is used for measuring glycogen levels.

#### Description

Glycogen is the primary short term energy storage molecule in animals, synthesized primarily in the liver and muscle. Glycogen is a branched glucose polymer, in  $\alpha$ -1,4 linkage, with branching via  $\alpha$ -1,6 linkage. Abnormal ability to utilize glycogen is found in diabetes and in several genetic glycogen storage diseases. The Glycogen Assay Kit is an easy and convenient assay to measure glycogen levels in biological samples. In the assay, glucoamylase hydrolyzes the glycogen to glucose which is then specifically oxidized to produce a product that reacts with OxiRed probe to generate color (OD 570 nm) and fluorescence (Ex/Em = 535/587). The assay can detect glycogen 0.0004 to 2 mg/ml.

#### Applications

- Measurement of Glycogen in various tissues/cells
- Analysis of metabolism and cell signaling in various cells

#### Target Species

Mammals

#### Usage

For research use only (RUO)

#### Storage

Store kit at  $-20^{\circ}\text{C}$ , protect from light and moisture. Briefly centrifuge all small vials prior to opening. Read entire protocol before performing the assay.

#### Kit Components

Hydrolysis Buffer 25 ml NMDDevelopment Buffer 25 ml WMOxiRed Probe 0.2 ml RedHydrolysis Enzyme

CREATIVE BIOMART<sup>®</sup>

Mix lyophilized BlueDevelopment Enzyme Mix lyophilized GreenGlycogen Standard (2.0 mg/ml) 100  
µl Yellow

---

**Detection method** Colorimetric, Fluorometric

---

**Compatible Sample Types**

• Animal tissues such as liver etc. • Cell culture: adherent or suspension cells

---
