

## Phosphate Fluorometric Assay Kit

### Product Information

---

#### Cat.No.

Kit-0687

---

#### Product Overview

---

Phosphate Assay Kit (Fluorometric) provides a sensitive, easy, quick means of assessing phosphate over a wide range of concentrations. In the assay, inorganic phosphate reacted with maltose to produce glucose in the present of a special enzyme. The glucose is specifically oxidized to generate a product that reacts with the OxiRed probe to generate fluorescence (Ex/Em=535/587nm). The kit can be used to detect Pi produced through reactions involving ATPases, GTPases, 5-nucleotidase, protein phosphatases, acid and alkaline phosphatases, and phosphorylase, etc. from a variety of samples. Glucose background can be eliminated by doing a glucose control.

---

#### Size

---

100 tests

---

#### Description

---

Inorganic phosphate (Pi) is one of the most important ions in biological systems. It functions in a variety of roles. One of the most important roles is as a molecular switch, turning enzyme activity on and off through the mediation of the various protein kinases and phosphatases in biological systems. A highly sensitive assay is desired to monitor Pi in variety samples or monitor Pi changes during kinase and phosphatase reactions.

---

#### Applications

---

Functional Studies more details

---

#### Storage

---

Store at -20°C.

---

#### Kit Components

---

Components: Identifier; Converter: Blue; Developer: Green; Phosphate Assay Buffer: WM; Phosphate Standard: Yellow; Phosphate Substrate: Purple; PicoProbe (in DMSO): Blue

---

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## Phosphate Fluorometric Assay Kit

### Compatible Sample Types

Urine, Serum, Plasma, Other biological fluids, Tissue Extracts, Cell Lysate

### Assay time

2h 00m

### Sensitivity

>0.4  $\mu$ M
