

Plasmin Activity Fluorometric Assay Kit

Product Information

Cat

Kit-0700

Common Name

Plasmin

Cat.No.

Kit-0700

Product Overview

Simple & convenient protocol.

Can detect Plasmin activity as low as 10 ng in a variety of samples.

Kit contains all necessary reagents for measuring plasmin activity.

Description

Plasmin (EC 3.4.21.7) is a serine protease occurring in plasma as plasminogen. Upon activation via cleavage by plasminogen activators; plasmin solubilizes fibrin clots and activates and/or degrades compounds of the coagulation and complement systems. Plasminogen-Plasmin system has also been implicated in a wide variety of physiologic and pathologic processes, including tumor growth, invasion and metastasis. Plasmin activity assay kit utilizes the ability of Plasmin to proteolytically cleave a synthetic substrate and release a fluorophore, AMC, which can be easily quantified by fluorescence microplate readers. This assay kit is simple, rapid and can detect Plasmin activity as low as 10 ng in a variety of samples.

Applications

Detect the activity of Plasmin in plasma

Usage

For Research Use Only! Not For Use in Humans

Storage

-20°C

Plasmin Activity Fluorometric Assay Kit

Size

100 assays

Kit Components

- Plasmin Assay Buffer
 - Plasmin Dilution Buffer
 - Plasmin Enzyme Standard (1 mg/ml)
 - Plasmin Substrate
-

Detection method Fluorescence (Ex/Em = 360/450 nm)
