

# Ascorbic Acid Colorimetric/Fluorometric Assay Kit

## Product Information

### Cat

Kit-1080

### Cat.No.

Kit-1080

### Description

Ascorbic Acid (Vitamin C) plays an important role in many biological processes. It is a potent anti-oxidant, anti-inflammatory, anti-viral agent, and an immune stimulant and is present in a wide variety of foods and biological specimens. It is important to be able to monitor ascorbic acid content in these different samples. Ascorbic Acid Assay Kit provides a rapid, simple, and sensitive means of detecting ascorbic acid in various biological samples. In this assay, our proprietary catalyst oxidizes ascorbic acid to produce a product that interacts with the ascorbic acid probe, generating color and fluorescence. Ascorbic acid can be easily determined by either colorimetric (spectrophotometry at  $\lambda = 570$  nm) or fluorometric (Ex/Em = 535/587 nm) methods. The assay can detect 0.01-10 nmol of ascorbic acid per assay in various samples.

### Applications

The assay can detect 0.01-10 nmol of ascorbic acid per assay in various samples.

### Storage

-20°C

### Shipping

Gel Pack

### Size

100 assays

### Kit Components

Ascorbic Acid Assay Buffer; Ascorbic Acid Probe (in DMSO); Catalyst; Ascorbic Acid Enzyme Mix (lyophilized); Ascorbic Acid Standard (20  $\mu$ mole)

## Ascorbic Acid Colorimetric/Fluorometric Assay Kit

### Target Species

---

Mammalian

---

**Detection method** Absorbance (570 nm) or Fluorescence (Ex/Em 535/587 nm)

---

### Features & Benefits

---

Simple procedure; takes ~ 5 minutes for the reaction to complete;  
Fast and convenient

---
