

Kinase Assay Kit - Ser/Thr 18 Peptide

Product Information

Cat

Kit-0901

Common Name

Kinase

Cat.No.

Kit-0901

Description

A coumarin and fluorescein-labeled peptide substrate which can be used for kinase screening in an antibody-free format. This peptide is based upon an optimized synthetic peptide substrate for DYRK1A, and containing an R-P-X-(ST)-P consensus sequence, where X is any residue.

Storage

Kinase Assay Kits contain all necessary reagents for performing primary or secondary screens. Most kit components should be stored at -20°C, and some kit components should be stored at -80°C. See COA for specific storage instructions.

Shipping

Dry Ice

Size

800 x 20 µL assays
