

PRMT8 Homogeneous Assay Kit

Product Information

Cat.No.

Kit-1863

Product Overview

PRMT8 is a histone methyltransferase that exhibits methylation activity toward histones H2A and H4.

Size

384 reactions

Description

The PRMT8 Homogeneous Assay Kit is designed to measure the activity of PRMT8 for screening and profiling applications, using AlphaLISA technology. The key to the PRMT8 Homogeneous Assay Kit is a highly specific antibody that recognizes methylated substrate. With this kit, only three simple steps on a microtiter plate are required for methyltransferase detection. First, a sample containing PRMT8 enzyme is incubated with the biotinylated substrate for one hour. Next, acceptor beads and primary antibody are added, then donor beads, followed by reading the Alpha-counts.

Applications

Great for studying enzyme kinetics and screening small molecular inhibitors for drug discovery and HTS applications.

Storage

12 months from date of receipt, when stored as directed. Kit components require different storage conditions. Be sure to store each component at the proper temperature upon arrival.

Kit Components

PRMT8: 50 µg; -70°C 100 µM S-adenosylmethionine: 250 µg; -70°C Primary antibody 4: 400 µg; -70°C Biotinylated histone H4 peptide substrate: 400 µg; -70°C 4x HMT assay Buffer 2: 3 ml; -20°C 4x Detection buffer: 2 ml; -20°C
