

## Caspase-7 Immunoassay Kit (Fluorometric)

### Product Information

**Cat**

Kit-2304

**Cat.No.**

Kit-2304

### Product Overview

Caspases play a key role in apoptosis. The CaspSELECT; Caspase-7 Immunoassay Kit provides an effective immunosorbent enzyme assay for the specific, quantitative detection of caspase-7 activity in microtiter plates. The assay utilizes caspase-7 polyclonal antibody to capture activated caspase-7 from cell lysates. Substrate DEVD-AFC is then added that is cleaved proportionally to the amount of activated caspase-7 in the cell lysate. The cleavage generates free AFC which is then analyzed fluorometrically (Ex./Em. = 400/505 nm) using a fluorescence plate reader. The assay ensures absolute specific detection of caspase-7. Other known caspases and non-specific proteases are not detected.

### Applications

Effective immunosorbent enzyme assay for specific, quantitative detection of caspase-7 activity in microtiter plates.

### Storage

-20°C

### Shipping

Gel Pack

### Size

100 assays

### Kit Components

Cell Lysis Buffer; Coating Buffer; Anti-Caspase-7 Antibody (20X); Blocking Buffer; Incubation Buffer; DTT (1 M); DEVD-AFC Substrate (1 mM); Positive Control (rh-Caspase-7); Microtiter Plate; Adhesive

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## Caspase-7 Immunoassay Kit (Fluorometric)

Plate Cover

---

### Target Species

---

Mammalian

---

**Detection method** Fluorescence(Ex/Em 370-425/ 490-525nm)

---

### Features & Benefits

---

Simple one-step procedure; takes only 2-4 hours; Fast and convenient
