

Fluorescein Active Caspase-12 Staining Kit

Product Information

Cat

Kit-2382

Cat.No.

Kit-2382

Product Overview

Activation of caspases plays a central role in apoptosis. The Fluorescein Caspase-12 Staining Kit provides a convenient means for sensitive detection of activated caspase-12 in; Living cells. The assay utilizes the caspase-12 inhibitor, ATAD-FMK, conjugated to FITC (FITC-ATAD-FMK) as a marker. FITC-ATAD-FMK is cell permeable, nontoxic, and irreversibly binds to activated caspase-12 in apoptotic cells.

Applications

Sensitive detection of activated caspase-12 in living cells.

Storage

-20°C

Shipping

Gel Pack

Kit Components

FITC-ATAD-FMK; Wash Buffer; Z-VAD-FMK

Target Species

Mammalian

Detection method Fluorescence microscopy, Flow cytometry and fluorescence plate reader (Ex. = 485 nm and Em. = 535 nm)

Features & Benefits

Simple one-step procedure; takes only 1-2 hours; Fast and convenient; The FITC label allows for
