

Fluorescein Active Caspase Staining Kit

Product Information

Cat

Kit-2401

Cat.No.

Kit-2401

Product Overview

Activation of caspases plays a central role in apoptosis. The CaspGLOW;Fluorescein Active Caspase Staining Kit provides a convenient and sensitive means for detecting activated caspases in; Living cells. The assay utilizes the caspase family inhibitor VAD-FMK conjugated to FITC (FITC-VAD-FMK) as a marker. FITC-VAD-FMK is cell permeable, nontoxic, and irreversibly binds to activated caspases in apoptotic cells.

Applications

Sensitive detection of activated caspases in living cells.

Storage

-20°C

Shipping

Gel Pack

Kit Components

FITC-ATAD-FMK; Wash Buffer; Z-VAD-FMK

Target Species

Mammalian

Detection method Fluorescence microscopy, Flow cytometry and fluorescence plate reader (Ex. = 485 nm and Em. = 535 nm)

Features & Benefits

Simple one-step procedure; takes only 1-2 hours; Fast and convenient; The FITC label allows for

CREATIVE **BIOMART**[®]
Assay Kit

Fluorescein Active Caspase Staining Kit

direct detection of the activated caspases in apoptotic cells
