

## TBARS Assay Kit

### Product Information

#### **Cat**

Kit-2431

#### **Cat.No.**

Kit-2431

### Product Overview

Oxidative attack of essential cell components by reactive oxygen species has been associated with several human diseases, such as atherosclerosis, cardiovascular diseases, diabetes, liver disorders, and inflammatory rheumatic diseases. THIOBARBITURIC ACID REACTIVE SUBSTANCES (TBARS) are low-molecular-weight end products (mainly malondialdehyde, MDA) that are formed during the decomposition of lipid peroxidation products. Increased levels of TBARS have been demonstrated in these diseases. Simple, direct and accurate assays for TBARS find wide applications in research and drug discovery. TBARS assay is based on the reaction of TBARS with thiobarbituric acid (TBA) to form a pink colored product. The color intensity at 535nm or fluorescence intensity at ( $\lambda_{ex/em} = 530\text{nm}/550\text{nm}$ ) is directly proportional to TBARS concentration in the sample.

#### **Storage**

-20°C

#### **Shipping**

RT

#### **Size**

100 tests

**Detection method** OD535nm, or FL530/550nm

#### **Compatible Sample Types**

Serum, plasma, urine, saliva etc

#### **Features & Benefits**

Tel: 1-631-559-9269 1-516-512-3133

Fax:1-631-938-8127

45-1 Ramsey Road, Shirley, NY 11967, USA

## TBARS Assay Kit

Sensitive and accurate. Linear detection range: colorimetric assay 1 -30  $\mu$ M, fluorometric assay 0.1 - 1. 5  $\mu$ M MDA.

---

**Assay time**

80 min

---

**Sensitivity**

0.1  $\mu$ M
