

Avian Infectious Bronchitis Virus (IBV) Antibody Detection Kit

Product Information

Product Overview

Virus Antibody Detection Kits

Description

Detects antibodies against Avian Infectious Bronchitis Virus (IBV) in poultry serum with high sensitivity and specificity.

Size

48t/96t

Applications

- Poultry farm surveillance and disease monitoring
 - Evaluation of vaccine efficacy in chickens
 - Diagnostic support during outbreaks
-

Features & Benefits

- High sensitivity and specificity for IBV antibodies
 - Compatible with high-throughput lab workflows
 - Fast turnaround for timely decision-making
-
