

Avian Influenza Virus Antibody Detection Kit (pan?subtype)

Product Information

Product Overview

Virus Antibody Detection Kits

Description

Designed to detect antibodies against all subtypes of Avian Influenza Virus (AIV).

Size

48t/96t

Applications

- Comprehensive avian influenza screening
 - Routine flock health monitoring
 - Post-vaccination immune assessment
-

Features & Benefits

- Detects multiple AIV subtypes in one assay
 - High sensitivity and specificity
 - Compatible with a wide variety of poultry species
 - Simplifies AIV surveillance efforts
-
