

Pseudorabies Virus (PRV) gB Antibody Detection Kit

Product Information

Product Overview

Virus Antibody Detection Kits

Description

Developed for the detection of antibodies targeting the gB glycoprotein of the Pseudorabies Virus (PRV).

Size

48t/96t

Applications

- Post-vaccination monitoring
 - Breeding herd health assessments
-

Features & Benefits

- Specific detection of PRV gB antibodies
 - High sensitivity with minimal cross-reactivity
 - Supports PRV eradication programs
 - Compatible with high-throughput workflows
-
