

# Pseudorabies Virus (PRV) gE Antibody Detection Kit

## Product Information

---

### Product Overview

---

Virus Antibody Detection Kits

---

### Description

---

Designed for the detection of PRV gE-specific antibodies, this kit supports DIVA strategies for vaccinated swine populations.

---

### Size

---

48t/96t

---

### Applications

---

- Distinguishing infected from vaccinated pigs
  - PRV monitoring and control
  - Serological surveillance in PRV-free zones
- 

### Features & Benefits

---

- DIVA-compatible for gE-deleted vaccines
  - High sensitivity and specificity
  - Easy-to-use, standardized procedure
  - Widely used in national PRV eradication campaigns
-
