

Furazolidone Metabolite Detection Kit

Product Information

Product Overview

Drug / Contaminant Residue Detection Kits

Description

Detects AOZ, the key metabolite of Furazolidone, in meat, milk, and seafood products.

Size

48t/96t

Applications

- Detection of Furazolidone residues in food
- Compliance testing for exports
- Veterinary drug surveillance

Features & Benefits

- Fast and efficient AOZ detection
- Suitable for various matrices including muscle and liver
- ELISA format enables high-throughput testing
- Supports residue monitoring programs
