

Tetracyclines Multi-Residue Detection Kit

Product Information

Product Overview

Drug / Contaminant Residue Detection Kits

Description

Identifies multiple tetracycline antibiotics in a single test.

Size

48t/96t

Applications

- Detection in meat, milk, and honey
 - Food safety audits
 - Routine screening for tetracyclines
-

Features & Benefits

- Simultaneous detection of multiple residues
 - Fast and economical testing
 - Suitable for various matrices
 - Robust and consistent performance
-
