

## Introducing Our Perfect Protein Pre-coupled Magnetic Beads Products!

## Introducing Our Perfect Protein Pre-coupled Magnetic Beads Products!

---

The world of laboratory and pharmaceutical industries is evolving at an unprecedented pace. To keep up with these changes, we are proud to introduce our cutting-edge Protein Pre-coupled Magnetic Beads products. Powerful and efficient, these innovative immunoassay tools set a new method in biological research and protein purification procedures.

### Advantages of Pre-coupled Magnetic Beads

- Eliminate the time-consuming step of coupled protein to the beads
- Saving time
- Reducing manual errors
- Ensures batch-to-batch consistency
- Low nonspecific binding
- High binding capacity
- Excellent elution efficiency
- Uniform size magnetic beads with narrow size distribution
- Large surface area and unique surface coating
- Stable and can be easily stored
- Compatible with most buffers and reagents

### Applications of Protein Pre-coupled Magnetic Beads

- Immunocapture
- Cell stimulating

- Biopanning
- Flow cytometry
- Immunoassay
- *In vitro* diagnostics
- Cell sorting
- Immunoprecipitation/Co-precipitation
- Protein/antibody separation and purification

Elevate Your Research with Protein Pre-Coupled Magnetic Beads! Our range of Protein Pre-coupled Magnetic Beads boasts high binding capacity, specificity, and reproducibility. The pre-coupling feature saves time, reduces handling, and increases operational efficiency. With easy-to-use protocols and consistent results, our product range is designed for maximum performance.

Step into the future of biological research and protein purification with our comprehensive range of Protein Pre-coupled Magnetic Beads products. Enhance efficiency, boost results and revolutionize your lab operations today! For further information about our products and their potential applications, please feel free to get in touch with our specialist team.
