

Active Recombinant Human Insulin

Recombinant human insulin is a form of insulin that is produced in a lab and used to treat diabetes. This allows for a large-scale production of insulin, making it accessible and affordable for people with diabetes. This Recombinant Human INS was a two chain, non-glycosylated polypeptide chain, and was expressed in *E. coli*.

Creative BioMart is one of the preeminent suppliers of protein products, with a strong emphasis on recombinant proteins. Our spectrum of offerings includes, among many others, a recombinant version of the **Active Recombinant Human Insulin**.

The dynamic nature of F3 protein, combined with its crucial roles in cell metabolism and growth, makes it an attractive target for developing innovative treatments for a wide variety of diseases. Its potential use ranges from promising tools for targeted tumor therapy to revolutionizing cell therapies and regenerative medicine.

Featured Product

Product Information

Quality Certificationn

Cat. No.	INS-14H
Product Name	Active Recombinant Human Insulin , Low Endotoxin , Media Grade
Source	E.coli
Species	Human
CAS. No.	11061-68-0
Storage	2-8°C

Appearance	White powder
Bio-activity	≥ 27.5 U/mg
Purity	99.5%
HCP residue	≤ 10 ng/mg (ELISA)
Molecular Mass	~5807.5 Da
Endotoxin	< 10 EU/mg

Advantages

- No allergic reactions
- Mass production
- Closely mimic human insulin

Applications

- Development of insulin analogs
- Treatment of both type 1 and type 2 diabetes

Choosing our company's recombinant human insulin protein means investing in quality and confidence. At Creative BioMart, we pursue an unwavering commitment to exacting standards, rigorous testing, and constant improvement.
