

Bioactive Recombinant SOD1 Proteins

Superoxide Dismutase 1 (SOD1) is an enzyme within the human body that prevents oxidative damage. Its super-antioxidant ability can effectively remove superoxide free radicals and pigment deposited in the skin, thus preventing skin pigmentation, color spot formation, and skin aging, as well as enhancing skin moisturization.

Creative BioMart is reaching out today to introduce our featured product—Recombinant Human SOD1, which outpaces its native form.

Advantages compare to native SOD1

- Higher activity
- Longer half-life
- Higher stability
- Lower immunogenicity
- Higher yield
- Higher purity
- Stronger specificity

Cat. No.	SOD1-1570H
Product Name	Recombinant Human SOD1
Source	<i>E. coli</i>

Cat. No.	SOD1-1570H
Purify	> 90% by SDS-PAGE
Activity	1,175 units/mg

We also offer **Customized Recombinant Protein Services** to ensure your protein of interest is achieved. Please contact us for more information.
