

Convenient Avi-tagged Recombinant Protein

Convenient Avi-tagged Recombinant Protein

Avi-tag is a popular fusion tag with powerful and versatile properties. Fused to the protein, the Avi tag provides a multi-functional system useful for many applications. Biotinylation of the Avi tag is to covalently attach a biotin molecule to the lysine residue within the Avi-tag.

Advantages of Avi-tag Biotinylated Recombinant Proteins

- ★ Consistent labeling
- ★ Uniform protein orientation
- ★ Equivalent bioactivity

Avi-tag system protein can be simply and efficiently purified or adsorption fixed. Its number of applications in medical and industrial fields continues to increase. Creative BioMart provides a list of Avi-tagged proteins below. Please contact us for more information.
