Immuno-Target: FLT-3

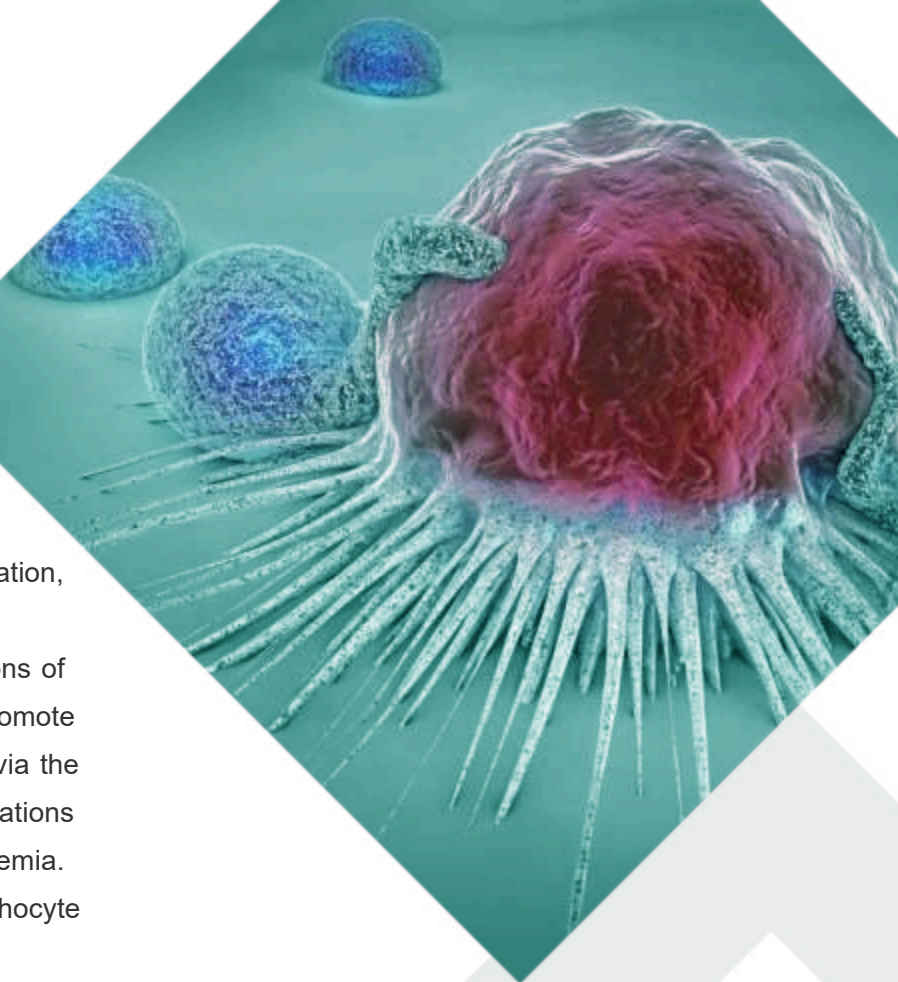

Flt-3 is known as a cell surface receptor for cytokine FLT-3 ligand and regulates differentiation, proliferation and survival of hematopoietic progenitor cells and of dendritic cells. Mutations of FLT-3 that cause constitutive kinase activity promote cell proliferation and resistance to apoptosis via the activation of multiple signaling pathways. Mutations happened would lead to cancer such as leukemia. Signaling through FLT-3 is important for lymphocyte development.

Full Name	fms-related tyrosine kinase 3	Research area
Synonyms	FLT3; CD135; FLK2; STK1; STK-1; CD135 antigen; FLK-2.	Cancer Immunotherapy; Immune Checkpoint; Immunotherapy; Targeted Therapy

Featured Products

Cat. No.	Product Name
FLT3-2243H	Recombinant Human FLT3, His tagged
FLT3-303M	Recombinant Mouse FLT3, His-tagged
FLT3-1155R	Recombinant Rhesus Monkey FLT3 Protein, His-tagged

📍 45-1 Ramsey Road, Shirley, NY
11967, USA

Creative BioMart provides:

- ◆ Active sample testing size at low price
- ◆ Competitive bulk price for quantity of 1mg and more
- ◆ Multiple tag and expression host options
- ◆ Flexible custom service of labeling, secondary purification, formulation optimizing
- ◆ Fast turnaround
