High-Quality TNFRSF17 Proteins for Immunoassays and More! –Request Free Samples

We are pleased to introduce our company's latest featured products:

Cat. NO.	Identity	Species	Source	Tag	Price
TNFRSF17-2348H	TNFRSF17	Human	HEK293	Fc/His	\$398.00 / 50 µg
TNFRSF17-2348HP	TNFRSF17	Human	HEK293	Fc/His, R-PE labeled	\$1,298.00 / 50ug \$1,898.00 / 100µg

Advantages:

1. High purity: Our production process and technology can ensure the high purity and biological activity of the product, fully meeting your experimental and research needs.
2. Reliability: Our products have undergone multiple quality tests and reputation certifications to ensure the quality and consistency of each batch of products.
3. Diversity: We offer products in two forms: unlabeled and R-PE labeled, which can meet your different experimental needs and application scenarios.

Our products can be widely applied in multiple research fields:

- Tumor immunotherapy
- Th17 cell research
- CRC research

- Cytokine Cell Binding Experiment
- Stimulating cell proliferation experiment
- Western blot analysis
- Analysis of protein-protein interaction

Our customers have successfully used our product in multiple experiments and have given positive feedback on its quality and effectiveness.

In addition, we also provide **free trial kits** for you to try out the effects of our product first. We believe that your trial will greatly satisfy you.

If you have any questions about product performance, application, and price, please feel free to contact us at any time. We look forward to providing you with high-quality service.
