

Native Bovine Hemoglobin Glutamer, Exciting Opportunities for Discovery!

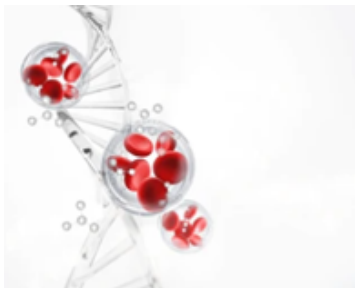

We are here to introduce our state-of-the-art research product, the Native Bovine Hemoglobin (bHb) Glutamer, a high-value resource designed to fuel your life sciences research, development, and diagnostic endeavors.

Native Bovine Hemoglobin Glutamer is a protein mined from bovine blood. With its remarkable stability and versatile functionality, our product offers a range of research opportunities.

Featured Product

| | |
|---------------|-----------------------------------|
| Cat. No, | Hemoglobin Glutamer-01B |
| Product Name | Native Bovine Hemoglobin Glutamer |
| Source | Bovine |
| Endotoxin | ≤ 0.25 EU/mL |
| Concentration | 130 mg/mL |

Advantages

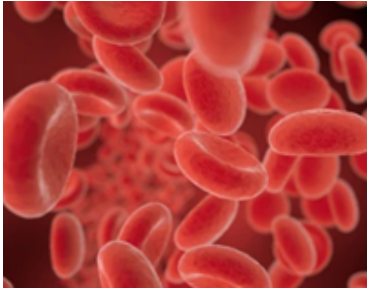

High quality. bHb Glutamer has been meticulously processed to eliminate contaminants. This ensures that you are receiving a purer, more reliable product for your work.

Cost-effectiveness. While preserving optimal performance and quality, we've ensured our Native Bovine Hemoglobin Glutamer is affordable and accessible.

Our product is backed by uncompromising quality inspections and controls, guaranteeing absolute **consistency, reliability, and reproducibility** in research applications.

We cordially invite you to experience the unparalleled functionality, enhanced reproducibility, and significant cost-savings achievable by incorporating our Native Bovine Hemoglobin Glutamer into your research repertoire.

Applications

We urge you to note that our bHb Glutamer is not approved for use for direct medical treatments or procedures.

- Studying cellular oxygen processes
- Developing diagnostic tools
- Formulating novel hypotheses
- Fostering groundbreaking discovery
- Manufactory materials.

To learn more or request a sample, please contact our dedicated sales team today. We look forward to supporting your research endeavors and are eager to provide solutions that empower you to disrupt, innovate, and achieve.
