

SARS-COV-2 PROTEINS

New Mutant RBD Spike Proteins and Service

As we move into the new year, we continue to work hard to overcome the challenges posed by COVID-19. Thanks to scientists like you, we now have the vaccines, at an unprecedented rate in history, to fight this pandemic.

Creative BioMart is proud to support scientists and doing everything we can to accelerate the research in these difficult times.

We have collected many SARS-CoV-2 related proteins and druggable target proteins. And we have just added a new catalog of mutant receptor-binding domain (RBD) spike proteins. Please visit our website for a list of mutant RBD spike proteins.

[Click to Enter the Catalog](#)

Virus mutation is a natural phenomenon that has always occurred. We can also **customize mutant proteins** if our current list does not include your protein of interest. Single mutant, multiple mutants, deletion, or insert mutant can be customized according to customer requirements.
