

SARS-CoV-2 Delta Variant Proteins

SARS-CoV-2 Delta Variant Proteins

Moving into the new year, Creative BioMart is still committed to overcoming the challenges posed by the COVID-19 pandemic. Several new variants of SARS-CoV-2 virus have emerged in recent months. The U.K. variant B.1.1.7, Brazil variant P.1, South Africa variant B.1.351, and the most recent Indian variant B.1.617 are particular concerning because of their high prevalence.

Creative BioMart is proud to support scientists and doing everything we can to help accelerate the research in these difficult times. We have just added a new panel of mutant RBD/spike and nucleocapsid proteins. They are thermally stable and can produce antibodies with neutralizing activity. Please visit our website for a list of mutant RBD/spike proteins.

We can also customize mutant proteins if our current list does not include your protein of interest.
