

Unraveling the Power of GMP IL11 Protein

Creative BioMart is a leading provider of recombinant proteins. We are thrilled to share insights about our top-notch product – the GMP IL11 protein, which can effectively enhance your research and development efforts.

Interleukin 11 (IL11), an important protein, influences various aspects of hematopoiesis. It holds excellent potential as a therapeutic agent for a series of medical applications. By acting as a growth factor, IL11 is involved in having protective roles in the gastrointestinal tract and fostering platelet formation in the bone marrow.

At Creative BioMart, we offer recombinant IL11, produced using state-of-the-art gene technology. Our recombinant IL11 holds several distinct advantages over conventional sources.

- Firstly, there's an assurance of high purity, as stringent processes eliminate potential contaminants, keeping its activity at the maximum.
- Secondly, using non-animal reagents in an animal-free facility under cGMP guidelines.
- Lastly, the greater batch-to-batch consistency promises a reproducible experiment environment, which could eliminate risks associated with inconsistent results.

We are proud to say that we offer superior quality while also managing competition in terms of functionality and pricing.

We wholeheartedly welcome discussions regarding the potential for collaboration. A strategic partnership between our companies could delve into the immense potential of recombinant IL11, aiding the scientific community's growth at large.

Thank you very much for your valuable time and consideration. We look forward to the prospect of working with you and your esteemed organization.

Featured Product

Cat. No.	IL11-4326HG
Product Name	Active GMP Recombinant Human IL11 protein
Bio-activity	Fully biologically active when compared to standard. The ED50 as determined by a cell proliferation assay using murine B9-11 cells is less than 1 ng/ml, corresponding to a specific activity of > 1.0 × 10^6 IU/mg.
Endotoxin	Less than 1 EU/μg of rHuIL-11 as determined by LAL method.
Purity	> 95 % by SDS-PAGE and HPLC analyses.

Ongoing Promotion

A promotional banner with a dark wood-grain background. On the left and right sides, there are several wrapped gift boxes in red, white, and gold. In the center, the text reads: "20% off on products and 10% off on services on Creative BioMart" in white and gold, followed by "Dec. 1, 2023-Jan. 31, 2024" in white. Below this, there is a red button with the text "Request More Information" in white.

Coming Exhibition

A banner for an upcoming exhibition. The background is a photograph of a city skyline at sunset, with several skyscrapers visible. Overlaid on the image is the text "Let's meet at the exhibition" in a large, dark purple font. To the right, the words "Biophysical Society" are visible in a lighter, semi-transparent font, with horizontal lines extending from the text.
