

Recombinant Human ABHD2 Protein, N-His6ABP-tagged

Cat. No. ABHD2-03H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant protein of human abhydrolase domain containing 2 (ABHD2) with a N-His6ABP (ABP = Albumin Binding Protein derived from Streptococcal Protein G) tag was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a protein containing an alpha/beta hydrolase fold, which is a catalytic domain found in a wide range of enzymes. The encoded protein is an acylglycerol lipase that catalyzes the hydrolysis of endocannabinoid arachidonoylglycerol from the cell membrane. This leads to activation of the sperm calcium channel CatSper, which results in sperm activation. Alternative splicing of this gene results in two transcript variants encoding the same protein.
