

Recombinant Human ADAT1 Protein, GST/His-tagged

Cat. No. ADAT1-1143H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human ADAT1 protein, fused to GST tag at N-terminus and His tag at C-terminus, was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene is a member of the ADAR (adenosine deaminase acting on RNA) family. Using site-specific adenosine modification, proteins encoded by these genes participate in the pre-mRNA editing of nuclear transcripts. The protein encoded by this gene, tRNA-specific adenosine deaminase 1, is responsible for the deamination of adenosine 37 to inosine in eukaryotic tRNA. Alternatively spliced transcript variants have been described. [provided by RefSeq, Jul 2010].
