

Recombinant Human APOL3, His-tagged

Cat. No. APOL3-3576H Lot. No. (See product label)

SPECIFICATION

Product Overview Apolipoprotein L3 (APOL3)

Species Human

Source E.Coli/Yeast

ProteinLength 402

Description This gene is a member of the apolipoprotein L gene family, and it is present in a cluster with other family members on chromosome 6. The encoded protein is found in the cytoplasm, where it may affect the movement of lipids, including cholesterol, and/or allow the binding of lipids to organelles. In addition, expression of this gene is up-regulated by tumor necrosis factor-alpha in endothelial cells lining the normal and atherosclerotic iliac artery and aorta. Alternative splicing results in multiple transcript variants.

Form This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.

Purity >90%

Notes Small volumes of APOL3 recombinant protein may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container's cap. Certain products may require to ship with dry ice.
