

Recombinant Human ARM CX1 cell lysate

Cat. No. ARM CX1-126HCL Lot. No. (See product label)

SPECIFICATION

Species

Human

Description

This gene encodes a member of the ALEX family of proteins and may play a role in tumor suppression. The encoded protein contains a potential N-terminal transmembrane domain and two Armadillo (arm) repeats. Other proteins containing the arm repeat are involved in development, maintenance of tissue integrity, and tumorigenesis. This gene is closely localized with other family members, including ALEX2 and ALEX3, on the X chromosome.
