

Human Amygdala Tissue Lysate

Cat. No. Amygdala-3H **Lot. No.** (See product label)

SPECIFICATION

Species	Human
Form	The human amygdala tissue total protein is provided in a buffer including HEPES (pH7.9), MgCl ₂ , KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, NP-40, and a cocktail of protease inhibitors.
Concentration	3 mg/ml
Tissue Type	Amygdala
Preparation method	Human amygdala tissue lysate was prepared by homogenization using a proprietary technique. The tissue was frozen in liquid nitrogen immediately after excision and then stored at -70°C. The human amygdala tissue total protein is provided in a buffer including HEPES (pH7.9), MgCl ₂ , KCl, EDTA, Sucrose, Glycerol, Sodium deoxycholate, NP-40, and a cocktail of protease inhibitors. For quality control purposes, the amygdala tissue pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining. The amygdala tissue is then Western analyzed by either GAPDH or β -actin antibody, and the expression level is consistent with each.
Safety Testing	This material has been tested by accepted techniques and has been found to be negative for HBsAg, HIV 1/2, and HCV. Additional patient information may be available upon request.
Diagnosis	Normal

 45-1 Ramsey Road, Shirley, NY 11967, USA

Expiration Date	One half year from date of receipt
Size	0.1 mg, 0.5 mg
Storage Instruction	This lysate should be aliquoted in working amounts and may be stored for up to one month at 2-8°C in a manual defrost freezer. Avoid Repeated Freeze Thaw Cycles. For longer term storage, freeze working aliquots at -70°C.
Applications	This lysate is for use in Western blotting, 10 µg to 20 µg per lane is recommended for mini gel.
