

Recombinant Human BAIAP3 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. BAIAP3-1290H Lot. No. (See product label)

SPECIFICATION

Product Overview	BAIAP3 MS Standard C13 and N15-labeled recombinant protein (NP_003924) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This p53-target gene encodes a brain-specific angiogenesis inhibitor. The protein is a seven-span transmembrane protein and a member of the secretin receptor family. It interacts with the cytoplasmic region of brain-specific angiogenesis inhibitor 1. This protein also contains two C2 domains, which are often found in proteins involved in signal transduction or membrane trafficking. Its expression pattern and similarity to other proteins suggest that it may be involved in synaptic functions. Several transcript variants encoding different isoforms have been found for this gene.
