

Recombinant Human B Lymphoid Tyrosine Kinase

Cat. No. BLK-642H Lot. No. (See product label)

SPECIFICATION

Species Human

Source E.coli

Description The gene encoding BLK is a member of the SRC family of protooncogenes and shows preferential expression in B-lymphoid cells. It is thought to function in a signal transducing pathway specific to this lineage.

Suggested Applications ELISA, Inhibition Assays, Western Blotting.

Presentation 100µg purified human BLK protein at 100g/ml in 50mM Tris-Acetate, pH7.5, 1mM EDTA, 20% Glycerol without BSA and Sodium Azide.

Characterization On SDS-PAGE commassie blue stained gel, the purified recombinant protein shows a band at 38kDa (including GST).

Storage & Stability Store vial at -20°C to -80°C. When stored at the recommended temperature, this protein is stable for 12 months.

GENE INFORMATION

Gene Name BLK B lymphoid tyrosine kinase [Homo sapiens]

Synonyms B lymphoid tyrosine kinase; MGC10442; BLK; BLK nonreceptor tyrosine kinase; EC 2.7.10.2; p55-BLK; B lymphocyte kinase

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Gene ID	640
mRNA Refseq	NM_001715
Protein Refseq	NP_001706
MIM	191305
UniProt ID	P51451
Chromosome Location	8p23-p22
Function	non-membrane spanning protein tyrosine kinase activity; ATP binding; nucleotide binding; protein binding; transferase activity
