

Recombinant Full Length Human calcitonin receptor Protein, Tag Free, Liposome

Cat. No. CALCR-22HFL Lot. No. (See product label)

SPECIFICATION

Product Overview	Human CALCR full-length ORF (NP_001733.1) recombinant protein without tag. This product is belong to Proteoliposome (PL).
Species	Human
Source	Wheat Germ
ProteinLength	1-474aa
Description	This gene encodes a high affinity receptor for the peptide hormone calcitonin and belongs to a subfamily of seven transmembrane-spanning G protein-coupled receptors. The encoded protein is involved in maintaining calcium homeostasis and in regulating osteoclast-mediated bone resorption. Polymorphisms in this gene have been associated with variations in bone mineral density and onset of osteoporosis. Alternate splicing results in multiple transcript variants.
