

Human CAPN2 Knockdown Cell Lysate

Cat. No. CAPN2-084HKCL **Lot. No.** (See product label)

SPECIFICATION

Product Overview	WB-validated CAPN2 Knockdown HeLa Cell Lysate
Species	Human
Source	HeLa
Description	<p>The calpains, calcium-activated neutral proteases, are nonlysosomal, intracellular cysteine proteases. The mammalian calpains include ubiquitous, stomach-specific, and muscle-specific proteins. The ubiquitous enzymes consist of heterodimers with distinct large, catalytic subunits associated with a common small, regulatory subunit. This gene encodes the large subunit of the ubiquitous enzyme, calpain 2. Multiple heterogeneous transcriptional start sites in the 5' UTR have been reported. Two transcript variants encoding different isoforms have been found for this gene.</p>
Form	Cell-Tissue Lysis buffer
Molecular Mass	80 kDa
Notes	<p>Instruction of use: This knockdown cell lysate should be paired with wild-type HeLa cell lysate for use. For Western blotting, we recommend running wild-type and knockdown lysates on the same gel, and loading each well with equal volume and equal amount of total proteins.</p>
Storage	Store at -20 centigrade for two years.
