

Recombinant Human CD14 Protein, Fc-tagged

Cat. No. CD14-124H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human CD14 protein with Fc tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	375
Description	The protein encoded by this gene is a surface antigen that is preferentially expressed on monocytes/macrophages. It cooperates with other proteins to mediate the innate immune response to bacterial lipopolysaccharide, and to viruses. This gene has been identified as a target candidate in the treatment of SARS-CoV-2-infected patients to potentially lessen or inhibit a severe inflammatory response. Alternative splicing results in multiple transcript variants encoding the same protein.
Form	Lyophilized
Molecular Mass	62.4 kDa
