

## CD3 protein-coupled magnetic NanoBeads

Cat. No. CD3-3943M Lot. No. (See product label)

### SPECIFICATION

<b>Species</b>	Human
<b>Beads Size</b>	1 mL
<b>Capacity</b>	Up to $1 \times 10^9$ total MNCs
<b>Formulation</b>	Bio-degradable matrix coated nanoparticle conjugated with anti-CD3 antibodies supplied in phosphate buffered-saline (PBS), containing Human Serum Albumin (HSA), pH 7.0-7.4.
<b>Application</b>	Positive selection or depletion of CD3+ T cells from leukapheresis, PBMC or cell cultures. Isolated CD3+ T cells can be used for culture and expansion, flow cytometry, T cells functional assays.
<b>Storage</b>	Store at 2-8 °C. Do not freeze.
