

Recombinant Human CD79B protein, Fc-tagged, R-PE labeled

Cat. No. CD79B-239HP Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human CD79B protein, Fc-tagged was Conjugated with NH2-Reactive R-PE(R-Phycoerythrin).
Species	Human
Source	HEK293
Description	NH2-Reactive R-Phycoerythrin is used for antibody conjugation for immunostaining and cellular proteins for tracing. NH2-Reactive R-Phycoerythrin has succinimidyl ester groups, and can easily make a covalent bond with amino groups of protein without any activation process.
Form	Liquid in sterile PBS buffer pH 7.4 (may contains tiny amount of reaction buffer and R-Phycoerythrin).
Endotoxin	<1EU/ug by LAL method.
Stability	Sample is stable for at least 12 months when stored at -20 to -80 centigrade from date of manufacture. For longer storage, add equal volume of glycerol to the sample solution and store at -20 to -80 centigrade.
Storage	Store under sterile conditions at -20 to -80 centigrade immediately after receipt. It is recommended that the protein be aliquoted for optimal storage. Avoid freeze-thaw cycles.

Conjugation R-PE

GENE INFORMATION

Gene Name CD79B CD79b molecule, immunoglobulin-associated beta [Homo sapiens]

Official Symbol CD79B

Synonyms CD79B; B29; Ig-beta; IGB; AGM6;

Gene ID 974

mRNA Refseq NM_000626

Protein Refseq NP_000617

MIM 147245

UniProt ID P40259
