

Recombinant Human CDH1 Protein, His-tagged

Cat. No. CDH1-43H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human CDH1, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
Species	Human
Source	Insect Cells
Description	CDH1, also known as cadherin-1, is a member of cell surface glycoproteins that mediate cell adhesion. Human CDH1 shares amino acid sequence identity with the rat and mouse proteins. It is a single-pass transmembrane protein that mediates calcium-dependent epithelial cell adhesion. This protein preferentially interacts with themselves in a homophilic manner in connecting cells. It may thus contribute to the sorting of heterogeneous cell types. It is involved in mechanisms regulating cell-cell adhesions, mobility and proliferation of epithelial cells. It is a ligand for integrin alpha-E/beta-7.
Form	Liquid. In Phosphate Buffered Saline (pH 7.4) containing 10% glycerol.
Molecular Mass	76.6kDa (694aa)70KDa (SDS-PAGE under reducing conditions)
