

Recombinant Human cadherin 5 Protein, Tag Free

Cat. No. CDH5-081H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human VE-cadherin protein (P33151) (Asp 48-Gln 599) without tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	48-599aa
Description	<p>Cadherins are calcium-dependent cell adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types. This cadherin may play an important role in endothelial cell biology through control of the cohesion and organization of the intercellular junctions. It associates with alpha-catenin forming a link to the cytoskeleton. Acts in concert with KRIT1 and PALS1 to establish and maintain correct endothelial cell polarity and vascular lumen. These effects are mediated by recruitment and activation of the Par polarity complex and RAP1B. Required for activation of PRKCZ and for the localization of phosphorylated PRKCZ, PARD3, TIAM1 and RAP1B to the cell junction.</p>
