

Recombinant Human CENPA Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CENPA-6623H Lot. No. (See product label)

SPECIFICATION

Product Overview	CENPA MS Standard C13 and N15-labeled recombinant protein (NP_001800) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	<p>Centromeres are the differentiated chromosomal domains that specify the mitotic behavior of chromosomes. This gene encodes a centromere protein which contains a histone H3 related histone fold domain that is required for targeting to the centromere. Centromere protein A is proposed to be a component of a modified nucleosome or nucleosome-like structure in which it replaces 1 or both copies of conventional histone H3 in the (H3-H4)₂ tetrameric core of the nucleosome particle. The protein is a replication-independent histone that is a member of the histone H3 family. Alternative splicing results in multiple transcript variants encoding distinct isoforms.</p>
