

Recombinant Human complement factor B, His-tagged

Cat. No. CFB-444H Lot. No. (See product label)

SPECIFICATION

Product Overview	CFB, 26- 259aa, Human, His tag, E.coli
Species	Human
Source	E.coli
Description	<p>CFB is complement factor B, a component of the alternative pathway of complement activation. Factor B circulates in the blood as a single chain polypeptide. Upon activation of the alternative pathway, it is cleaved by complement factor D yielding the noncatalytic chain Ba and the catalytic subunit Bb. The active subunit Bb is a serine protease which associates with C3b to form the alternative pathway C3 convertase. Bb is involved in the proliferation of preactivated B lymphocytes, while Ba inhibits their proliferation. Recombinant human CFB protein, fused to His-tag at N-terminus, was expressed in E.coli.</p>
