

Recombinant Human CFD Protein

Cat. No. CFD-790H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human CFD protein without tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	253
Description	<p>This gene encodes a member of the S1, or chymotrypsin, family of serine peptidases. This protease catalyzes the cleavage of factor B, the rate-limiting step of the alternative pathway of complement activation. This protein also functions as an adipokine, a cell signaling protein secreted by adipocytes, which regulates insulin secretion in mice. Mutations in this gene underlie complement factor D deficiency, which is associated with recurrent bacterial meningitis infections in human patients. Alternative splicing of this gene results in multiple transcript variants. At least one of these variants encodes a preproprotein that is proteolytically processed to generate the mature protease.</p>
