

Recombinant Human CNOT6 Protein (153-557), His tagged

Cat. No. CNOT6-2174H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human CNOT6 (153-557) fused with His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	153-557
Description	<p>Poly(A) nuclease with 3'-5' RNase activity. Catalytic component of the CCR4-NOT complex which is one of the major cellular mRNA deadenylases and is linked to various cellular processes including bulk mRNA degradation, miRNA-mediated repression, translational repression during translational initiation and general transcription regulation. Additional complex functions may be a consequence of its influence on mRNA expression. Involved in mRNA decay mediated by the major-protein-coding determinant of instability (mCRD) of the FOS gene in the cytoplasm. In the presence of ZNF335, enhances ligand-dependent transcriptional activity of nuclear hormone receptors, including RARA. The increase of ligand-dependent ESR1-mediated transcription is much smaller, if any. Mediates cell proliferation and cell survival and prevents cellular senescence.</p>
